PRODUCT SUMMARY

Finance operator who became a builder. I spot broken workflows, scope the highest-impact fix, and ship product that people actually use. Independently designed and deployed a 13-module internal ERP now running daily across 3 branches for 20,000+ students — owning the full product loop (problem → build → adoption → measured impact) on a live business. Strong on user empathy, prioritisation, data-driven decisions and a relentless bias to ship. Now seeking an Associate Product Manager role to do this full-time.

WHAT I BRING TO A PRODUCT TEAM

Product: Problem framing · Prioritisation · Roadmapping · User research · MVP scoping · Iteration · Metrics & success definition

Execution: AI-assisted building · 0→1 shipping · Process design · Workflow automation · Data modelling · Rapid prototyping

Business & Data: Financial analysis · P&L / unit economics · MIS reporting · Excel / Google Sheets (Advanced) · GST / TDS · Dashboarding

Working style: Stakeholder management · Cross-functional collaboration · Self-directed · Multi-branch operations · Bias to ship

EXPERIENCE

Sprouts Edu Tours

September 2024 – Present

Senior Accounting Executive & Builder

- Owned end-to-end receivables of Rs 3 crore+ across 200+ tours — the workflow I later productised — with 100% invoicing accuracy and outstanding payments down 30% in 6 months.
- Ran continuous user research with finance, ops and management to frame problems, then scoped and prioritised the highest-impact fixes into a shipped roadmap.
- Built a centralised system for 200+ tours and 20,000+ students, replacing fragmented spreadsheets and giving the team a single source of truth with real-time visibility.
- Drove adoption of the internal ERP across 3 branches (Mumbai, Hyderabad, Bangalore), replacing manual cross-department coordination and cutting manual work 40% and reporting time 50%.

FLAGSHIP PRODUCT — 0 TO 1, SOLO BUILD

Sprouts ERP — Finance & Operations Platform

Built with AI dev tools · Live in production · Used daily company-wide across 3 branches

- Problem: Finance & ops ran on disconnected spreadsheets across 200+ tours; reconciliation ate 10+ hours weekly with no single source of truth.
- Insight: The team didn't need more headcount — it needed one connected system tying receivables, expenses and reporting together.
- What I built: A 13-module ERP covering receivables & aging, invoicing, expenses, GST/TDS, budgeting, tour ops, P&L reporting and role-based access — scoped, built and shipped independently.
- Outcome: Adopted company-wide across 3 branches; cut manual work 40%, sped reporting 50%, and became the operational backbone of the business. The receivables module alone tracks Rs 47 lakh+ with aging buckets, per-client ledgers, TDS/TCS tracking and PDF/Excel/CSV export.

EDUCATION

R.A. Podar College of Commerce & Economics, Mumbai University

CGPA 8.49 (A+)

Bachelor of Commerce

CERTIFICATIONS

Google AI Essentials (Google/Coursera) · Financial Markets with Honors (Yale/Coursera) · Financial Modelling & Fundamental Analysis (Udemy) · Fundamentals of Digital Marketing (Google/Coursera)

NOTABLE WINS

- Built and deployed a production-grade internal product adopted company-wide — recognised by management as a transformational operations initiative (2024–25); led the cross-department automation drive behind it, cutting manual tasks 40% and reporting time 50% within the first year.
- 1st place, International Olympiad of Mathematics (2017); Head of Creatives, “Rapport” Intra-College Fest, R.A. Podar (2018 & 2023) — quantitative foundation and leadership beyond academics.
